Collaborative Process Modeling with **Signavio Process Manager**

“The intuitive usability of Signavio’s Process Manager immediately showed us that we were on the right path. The whole team could efficiently be included in optimizing procedures.”

Valentin Jäger,
Life Food GmbH - Taifun Tofuprodukte (Taifun Tofu Products)

Successfully understanding, documenting and optimizing the processes in an organization requires the inclusion of many minds and excellent communication.

Providing a constructive approach and effective improvement of internal workflows, Signavio's software solution is your ideal support in the design of your business processes. It combines the advantages of modern BPM tools with flexible cloud service.

Professional BPM

With globalization and changing markets, processoriented thinking and management are becoming more important than ever for all industries. Efficient business process management reduces costs, raises customer satisfaction and minimizes the time expenditure for projects.

Signavio is a market leader in collaborative process design with expertise in all phases of modeling, from documentation to analysis and optimization of processes. With offices in Berlin, Boston, Singapore and more, Signavio offers the Process Manager as both a cloud service and on-premise installation. Both versions include comprehensive features and an especially user-friendly modeling environment, making it just as well-suited to beginners as those with more modeling experience.

To facilitate perfect coordination and process improvement, the Signavio Collaboration Hub enables processes to be easily shared with all co-workers and process stakeholders. With the use of the comment function, employees can be invited to leave comments and feedback while reviewing the steps of the process.

The QuickModel is particularly user-friendly. Simply fill out an Excel-like table with the process steps and a process diagram is simultaneously mapped out. No prior knowledge of the BPMN 2.0 modeling standard is necessary.

Would you like to learn more about the robust features of the Signavio Process Manager, set up your own modeling guidelines, run your own risk management or simulate your processes? Try out the software free for 30 days at www.signavio.com/try/
