Signavio for students – BPM Academic Initiative

**BPMACADEMIC
INITIATIVE**

ACADEMIC PARTNERS

Process modeling is an integral part of many business administration and IT curricula these days. The Academic Initiative supports Business Process Management (BPM) in academic teaching and research.

As part of the initiative, Signavio offers a web-based process modeling platform to students, lecturers and researchers. More than 10,000 users around the world have already signed up to create BPMN 2.0 diagrams and other process models – free of charge.

BPM Academic Initiative

Join the BPM Academic Initiative and get free access to one of the leading process modeling platforms. It is an ideal tool for lectures, seminars and projects. As there is no installation required, using the platform is as easy as it could be. The Signavio Process Manager supports multiple modeling languages such as BPMN 2.0, EPC and Petri nets.

BPM Academic Initiative for students:

As a BPM Academic Initiative participant you will benefit from a collaborative workspace for your project team. In addition, you can use the Signavio Process Manager to prepare your Bachelor/Master

Thesis. This is your chance to use this professional modeling tool completely free of charge.

BPM Academic Initiative for lecturers:

Use the BPMN teaching packages in your university and offer your students the possibility of practical training with the Process Manager. Open up a collaborative workspace and invite your students by sending an invitation link via E-Mail.

Who is eligible to use the platform:

- > Students who are currently enrolled at a university and employ the Signavio Process Manager in the context of a university course or project or in the context of non-commercial process modeling training.
- > Lecturers or researchers who are using the platform for non-commercial and non-productive purposes or for a publicly funded research project in a non-productive way.
